THE MAIN RESULTS

Results no. 1: Informative Toolkit

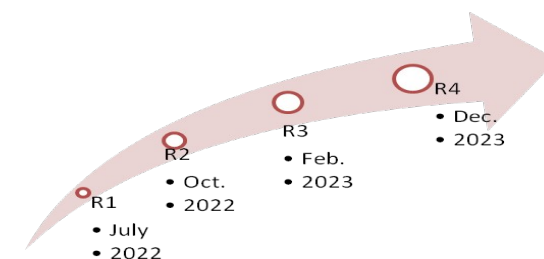

The project will start with research on vaccination and immunization to detect the key issues and establish the topics for the Informative Guide

The partners will map on Internet for the informative resources and tools which can be used by healthcare staff for to improve update and upgrade their knowledge on vaccine and vaccination.

Then, the partners will create the info sheets, translated in all partners' languages and will organize informative campaigns among vulnerable groups and vaccine hesitant people.

Results no. 2: The European model and Training Curriculum

Building on the PPT/IENE Model developed in previous IENE projects, partners will establish the training Curriculum of healthcare professionals involved in vaccination and immunization aiming at enhancing their competence to tackle with vaccine hesitancy, communicate and social relationship skills to work with people coming from hard to reach groups.

Results no. 3: Bite sized Learning Tools

The partners will create Bite sized learning tools, organized in a attractive form with links to additional resources, You tube videos, animations and other information sources collected from the Internet in CC license which will be posted on the web platform in the form of easy to navigate course in all partners' languages to be used by healthcare staff for self learning and improve their knowledge on vaccination.

Results no. 4: Massive Open Online Course (MOOC)

Under the coordination of Edunet, partners will create a methodology and content for a Training Course on vaccination and set up the Online Course (MOOC), aiming to train healthcare professionals to tackle with vaccine hesitancy.

The course will be delivered, piloted and evaluated during six weeks.

Proposed target groups

Health care professionals involved in delivering vaccination participants in the MOOC	100
MOOC facilitators participants in the training	16
Participants in Seminars and European conference	140
Stakeholders	120
People that are more hesitant or people from disadvantaged groups participants in information campagne	800
Persons reached in dissemination (face to face+online)	4000
