

VACCINATION AND BREASTFEEDING

How can I protect my baby from different diseases?

The importance of **vaccination** during pregnancy and breastfeeding.

Breastfeeding is **compatible with vaccines** for the mother, the baby and other people living with them.

Through breastfeeding, passive immunity is transferred to the baby.

No harmful side effects for babies

The mother's immunity protects the baby for the first weeks of life.

Pro Vac
Promoting Vaccination
IENE 11

Vaccination protects both mother and baby
